

Allowing a media company to issue a free one hour non-news, partisan "advertisement" on television is violating the laws of the land and the basic public trust in media laws in this country. Clearly, this company has nothing more than a political agenda and is manipulating the public by calling it "news". The FCC took away the fairness doctrine, so you have a responsibility to uphold the media's integrity during a political campaign or we will never again have a fair election. The richest media stations will skew the information and election. Have some dignity and integrity on this and stop this!
